About Cardno

- Physical, social and economic infrastructure services company
- Operating since 1945
- Employees worldwide: 3,600+
- Listed on the ASX in 2004 – Symbol: CDD
- FY2009 Revenue: AU\$515.84 million
- 150 offices worldwide

Cardno is an integrated professional services provider, delivering a diverse range of services including international development assistance, structural, geotechnical, civil and environmental engineering (in areas such as urban, traffic, water and coastal), survey and mapping, planning/project management and asset management services.

We operate with a global network of over 3,600 personnel in more than 60 countries. Together we form a strong multidisciplinary team with a wealth of knowledge, expertise and passion for improving the physical and social environments that underpin communities around the world.

Cardno is represented in the majority of states and territories in Australia, and has permanent offices in England, Belgium, United Arab Emirates, Indonesia, Papua New Guinea, New Zealand, Kenya, Canada, Ecuador, Peru and the United States.

With expertise in the full range of disciplines, Cardno is a valued resource for federal, state and local governments as well as private clients in the construction, environment, transportation, property development, water resources, telecommunications, waste, international aid, marine and coastal, agriculture, manufacturing and mining fields.

Partnering with private clients, sovereign governments and communities to create appropriate and sustainable solutions to local issues, Cardno's international development assistance areas of expertise include community development, health & HIV/AIDS and reconstruction and rehabilitation.

Additionally, Cardno provides software to engineering businesses via its water engineering software suite XP Software and stormwater drainage design software through Micro Drainage.

Cardno History

2005 to 2010

In recent years Cardno has continued to expand and diversify through organic growth and strategic acquisitions locally and internationally. All additions to the Cardno group have been selected and targeted based on calculated considerations for enhanced regional and professional discipline coverage. The Cardno group boasts a successful track record of mergers and acquisitions and is a cornerstone of the group's growth strategy.

1999: McMillan, Britton & Kell to form Cardno MBK
In 2004 Cardno Limited listed on the Australian Securities Exchange to position the firm for further growth.

1945 to 1999

The original engineering practice from which the Cardno group evolved commenced operations in Brisbane, Queensland in 1945 as Cardno & Davies. This partnership worked largely in the civil engineering consulting services market and achieved a reputation for its expertise and experience. The core business at this time was providing engineering services to public and private sectors for the development of Queensland's infrastructure. During this period Cardno had offices in Brisbane, Gold Coast, Sunshine Coast, Townsville and Papua New Guinea.

In 1999 Cardno & Davies merged with McMillan, Britton & Kell, a New South Wales-based consulting engineering practice with origins dating back to 1936. At this time the company was known as Cardno MBK.
