

Community Centre

Location

Australia

Office Responsible

Cardno Grogan Richards

Responsibilities

Traffic and Transport

Project Scope

Cardno Grogan Richards has been involved with the development of a number of community centre developments. We are involved with the review of parking supply and demand in the vicinity of the site, assessment of traffic generation and impact on the surrounding road network, and design of car parking, bicycle parking and access for the community centre.

Community centres can incorporate a number of uses such as a primary school, kindergarten, playgroup, childcare, healthcare, library, community group, parents group, neighbourhood house, youth centre, fitness facilities, gallery and a multi-purpose facility. Overall requirements for a community are derived with comprehensive analysis encompassing all associated uses.

Projects Include:

- Springvale Integrated Services Hub
- Karingal Family and Children's Hub
- Monbulk Community Centre and Hub
- Keysborough Community Centre
- Healesville Memorial Hall
