

## Education Developments

### Location

Australia

### Office Responsible

Cardno Grogan Richards

### Responsibilities

Traffic and Transport

### Project Scope

Cardno Grogan Richards have been involved in a wide range of education developments including ELC, Primary, Secondary, Tertiary and University developments.

### Projects include:

- Monash University - Clayton Campus
- Monash University - Caulfield Campus
- Deakin University - Geelong Campus
- Melbourne University
- Victoria's first Public Private Partnership for the delivery of 11 schools for the Axiom Consortium
- Several private and public primary schools throughout Victoria
- Several private pre-school, child-minding and kindergarten developments throughout Victoria

Cardno Grogan Richards has provided traffic and transport services to leading architect firms and the Department of Education for the preparation of master plans, strategy plans, documentation

phases and implementation phases for several Victorian universities and schools.

We pride ourselves in providing practical car parking advice and design solutions to cater for expanding education services.

We incorporate the best and most appropriate 'Green Travel Initiatives' to optimise the number of car spaces and bicycle spaces provided.

Pedestrian safety, safe crossing facilities and a logical pedestrian path network are paramount in the master design plans.

Our master plans for universities include a high level of accessibility for emergency vehicles, delivery vehicles, staff, student and visitor parking, while incorporating public transport, pedestrian and bicycle facilities ensuring an intergrated approach.
