- Parkville Comprehensive Cancer Centre
- Geelong Hospital
- Ballarat Hospital
- Bendigo Hospital
- Epworth Hospital
- St Vincent's Hospital
- Heidelberg Repatriation Hospital
- Ramsey Health
- Cabrini Hospital

Cardno Grogan Richards has provided traffic and transport services to the Department of Human Services, hospitals, health care providers and leading architect firms for the preparation of master plans, strategy plans, documentation phases and implementation phases for several Victorian major hospitals.

We pride ourselves in providing practical pedestrian accessibility and car parking design solutions to cater for expanding hospital services. We design and undertake the necessary parking and

interview surveys to gain a good understanding of the travel mode and parking characteristics of the staff and visitors generated by the hospitals. Furthermore we incorporate the best and most appropriate 'Green Travel Initiatives' to optimise the number of car spaces and bicycle spaces provided. Our master plans include a high level of accessibility for emergency vehicles, delivery vehicles, staff and visitor parking, while incorporating public transport, pedestrian and bicycle facilities ensuring an integrated hospital operation.
