

Road Safety Audits

Location

Melbourne, Australia

Office Responsible

Cardno Grogan Richards

Responsibilities

Traffic and Transport

Project Scope

Increasingly Government road authorities, designers, architects, planners and builders are avoiding unnecessary accidents and costly litigation by conducting road safety audits prior to commencement, during construction, and right through to when a project is opened to the public.

Cardno Grogan Richards have been involved in all stages of road safety auditing throughout a project. We understand how road safety auditing can impact on a project's future by enhancing the design process and ensuring the safest possible outcome for the end user. This is why we strive to work together with the design team throughout the development of a project to provide both safe and practical design solutions and advice.

Cardno have a wide range of experience in all stages of the road safety audit process, some projects undertaken to date

include:

- VicRoads Metropolitan North West region - Calder Freeway widening and interchange improvements - Functional design stage road safety audits
- Mildura City Council - Central business district, Mildura - Existing Conditions audit
- Yarra Ranges City Council - Warburton Rail Trail, Warburton - Bike rail trail Existing conditions audit
- Wyndham City Council - Signalised intersection, Leaks Road/Morris Road, Werribee - Detailed Traffic Signal design stage audit
- CrossCo Construction - Unsignalised Intersection, Venus Bay Road, Inverlock - Detailed civil design stage audit
- VicUrban- Road design, Roxburgh Park Drive, Roxburgh Park - Functional Design Stage audit

Cardno are able to provide road

Road Safety Audits
