

Signage and Way Finding Solutions

Location

Australia

Office Responsible

Cardno Grogan Richards

Responsibilities

Traffic and Transport

Project Scope

As well as documenting statutory line marking and signage Cardno Grogan Richards also provide comprehensive advice regarding directional and 'way finding' solutions across a range of projects.

This advice extends from arterial road networks to the development of packages for shopping centres, health and institutional developments.

A relevant example includes our engagement by VicRoads to implement the Statewide Route Numbering Scheme throughout Victoria.

The State Route Numbering Scheme was an element of the Linking Victoria Strategy. The aim of this scheme was to "develop a road network that is easy for the motorist to use", with particular benefits for the tourist.

Our established expertise in car park design is supplemented by the provision of 'way finding' signage which can effectively guide all relevant modes of

traffic including motorists, pedestrians, public transport and services vehicles during each stage of their visit to a development.

Projects Include

- Chadstone Shopping Centre
- Northland Shopping Centre
- Whitehorse Plaza
- Alfred Hospital
- Epworth Hospital
- Various Freeway Service Centres
