

Port Hinchinbrook Development

Location

Cardwell, Australia

Client

Cardwell Properties

Project Value

AUD\$150.0 Million

Start Date

January 2003

Office Responsible

Cardno

Responsibilities

Environmental impact study, specialist environmental consultancy, marine infrastructure and civil engineering design services.

Project Scope

This project involves the creation of a masterplanned resort community adjacent to an outstanding World Heritage Area. The environmental sensitivities of the region are well known and every development approval is extremely complex and is subject to Local Government, State Government, Federal Government, and Court Review. The Alliance to Save Hinchinbrook (ASH) actively campaign against every development proposal.

However, the technical expertise of Cardno has allowed a number of development proposals to be approved. Conflicts between the Developer (Keith Williams) and ASH are constantly managed by Cardno on the basis of supporting scientific fact.

Cardno has provided the following services:

- Regulatory environmental approvals management
- Environmental assessments and management plans
- Environmental management planning
- Marine engineering design and construction
- Endangered species assessments
- Water quality and flooding reports
- Coastal management planning
