

# Sunset Campground Rehabilitation Project

**Client:**  
SMUD

**Location:**  
Union Valley Reservoir, CA

**Key services:**

- > Aerial imaging and surface expansion
- > Data management
- > Video production
- > Professional photography

Utilizing Unmanned Aerial System, Cardno compiled photos and video of a completed project.

## Overview

Cardno worked with the Sacramento Municipal Utility District (SMUD) to redesign the Sunset Campground with basic topography done in AutoCAD.

Upon completion of the Sunset Campground project, Cardno experts used Unmanned Aerial System (UAS) to capture video and images of the finished project that would not have been possible with traditional methods. Utilizing UAS, we produced high spatial resolution aerial images and videos so the clients could view the completed project from every imaginable angle.
